So, let's start off with the good bits; The menu music (Avenged Sevenfold/Skillet or similar style of band) The graphis are good enough for this type of game. The handling - as far as turning and such, purely as a game mechanic, not as how it works in the game as a whole - isn't bad. Now for the reasons I gave it a thumbs down; (this first one is nitpicking and not really relevant, but with the music that good I do want to mention it) - No volume control. (this one's also quite a lot biased but more valid than the above) - You can't change camera, you're stuck with the 3'rd person variant they put in, even people that prefer 3'rd person (which I don't) prob. wants the ability to set near/far and you can't even do that. The placement of the Race standings on the left side of the screen, it makes it quite hard to know what the upcoming left turn looks like, especially as there's no mini-map showing the track. No E-brake in a game that screams for it, this is arcade racing in the vein of Dirt 4 (or Forza Horizon 3) buggy racing and you didn't add an E-brake? (the handling - though fairly good - isn't good enough for you to ride the racing line and it's absolutely not the kind of game within which you'd want to do that, this screams out "Let's go sideways and laugh!" and doesn't let you do one or the other) TBH I don't know who this game in it's current version is aimed at, it's certainly not the Forza Horizon/Dirt 4 me, it's not the (a slew of) NFS me, it's not the Flatout me, it's not the Rally Trophy/Colin McRae rally me, it's not the (even though it happens very rarely, I do know how they work and what makes them good) Cart racer me.. This could be a good game but the controls are awlful. Everything else about this game is fine. Not worth 5 dollars. I got it on sale for 50 cents. I may have overpayed for this game. 2/10 Rating Please follow me at One on One Gamers. As a curator I am looking for help from you wonderful people on steam to make my reviews better. Follow, comment, support.. Car floats across the track with no differnece with handling upgrades, still with practice its playable worth 50 cents for sure but overall its only a 50 cents game so dont expect much.. Horrible. The road feels like ice and the engine shuts off when you stop accelerating.. This is a solid arcade racing game. I gave season mode a try and it was pretty fun. Driving physics are better than I expected and the AI drivers were pretty good themselves. I might try the online trials later but its pretty good for the price and is definitely worth it.. Car floats across the track with no differnece with handling upgrades, still with practice its playable worth 50 cents for sure but overall its only a 50 cents game so dont expect much.
