OS: Windows Vista SP1+

Processor: Pentium 4, Athlon 64

Memory: 2 GB RAM

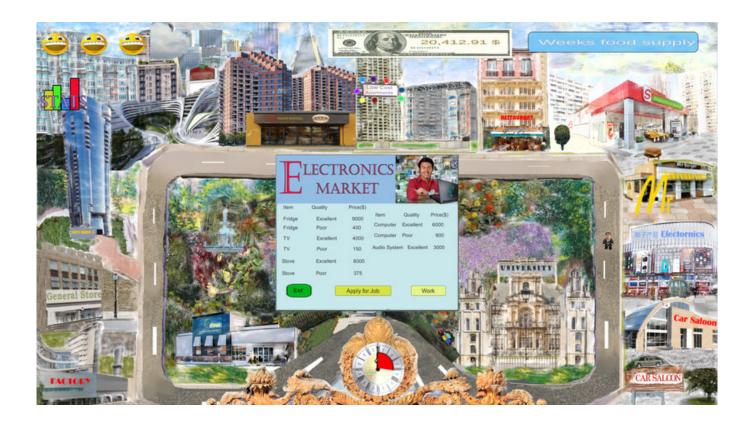

Graphics: Graphics card with DX10

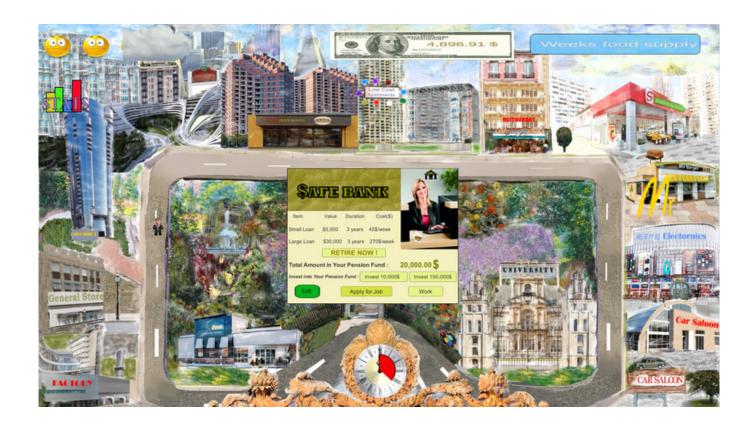

DirectX: Version 10

Storage: 700 MB available space

English

Don't buy it the Africa part of the game is so dull and boring, maybe it is meant to express the futility of trying to get ahead in life with no money or education, but is a grind with no other purpose you earn money get reputation which is fine but you are constantly sick or getting robbed so has taken $1\/2$ an hr of sitting and clicking work only to watch every time you make money it disappearing.... while this might reflect real life it is in no way enjoyable in a game. There is no access to banks or any sort of 'life' experience all you do is work and get robbed & sick then repeat.. Where to being with this review. If you want the short answer I personally think it\u2019s worth it when I look at the utility of enjoyment I had with versus the price. I have bought a mini of \u2665\u26

Now this is the second game I\u2019ve seen of recent date inspired by the classic if not Little know game now of Jones on the fast lane. The first game I saw the done this was this Grand Life even with its flaws was a wonderful put together game.

Know Life Lane where do I start the graphics of this game came out the 90s it would probably be more acceptable and most likely I hope that\u2019s the vibe they\u2019re going for it actually feels like I\u2019m playing a flash game from early 2000s both graphics and mechanics. Which people can either find incredibly charming or absolutely hate it I personally found the graphics charming in this archaic fashion. The one thing weird about the first map though is if it\u2019s simulating Africa or the darker skin Africans are on top of the lighter skins ones on the bottom it\u2019s kind of a weird.

Now talk about the narrative in the actual gameplay itself. First game start you off at a nameless African country that is a combination of every stereotype you think of both north Africa and anything in the south of the Massive content. Living expectations are poor pay is even worse corruption is flourishing and death is easy and extremists are all about. Your objective in this map is to gain enough capital legal or otherwise through all the legal tape work or otherwise to get to the USA.

Even with it\u2019s questionable graphics and representation I thought it was gonna be satire a little bit of it is though. But it\u2019s definitely a bit of a critique of America role In poor nations as well. And during this map the vital resource outside of your capital is your reputation with America and your reputation as a practicing Muslim. That\u2019s vital to gain most of the work majority of the word comes from you having a good reputation as a Muslim but to get the best jobs you need to be good with playing bolus for both sides. Which leads to interesting scenarios.

Wonderful things this game does and this is where I see a lot of the love coming in here for it work. Is there a generic advance advance based on your job and your position at work which are huge and you see that both in the African in the US map. Which can really make your fortune or kill you. That attention to detail depending on what is your career path and your reputation is how that world actually interact with you. It\u2019s very little thing but I like it there and it\u2019s a lot of sweat and tears in them aspect that makes the game so much more enjoyable. For example if you have a job at the US Embassy it be attacked. Which will joy experience if your fruit seller. One of the interesting things on the African map is there\u2019s no skills it\u2019s all based on reputation which translates into nepotism and connections for you to get into this positions. I personally like that touch.

Now to US map my big complain is I wish my the education mechanic was more realistic as you see in this grand life but I do love all the test taking systems you have throughout the entire game. Overall it was quite enjoyable and it\u2019s interesting when you see your choices catch up with you. For example all that my character eat was fatty food throughout the entire game is eventually caught up with him and he got diabetes very late into the game.

For example my character did Menial jobs when they got to the states they passed the real estate exam got lucky with some sales. And was able to use that to fund their education and threw some lucky events of conference is an online courses up the corporate ladder of the financial institution. Going back to how your job is affect would eventually get the higher you go up I was opened up two massive investment opportunities that if you have patients would pay off in dividends. Which allowed them to eventually retire comfortably to Hawaii. Versus their life back home where they had to carry around an arsenal of weapons not to get robbed over \$20. I think this game is served it\u2019s purpose I would love to see a third act in game enjoying the retirement.

. Introducing Migrant Simulator 2018\u2122 - The Quest for the Magic Soil.

The amount of clicking to constantly buy food is rediculous. Using a autoclicking script becomes a necessity for sanity. Very repetitive and shallow gameplay. Whether you succeed or fail is largely up to random chance.. for \$7 the game isn't worth it. Very repetitive. I do not think their are multiple scenarios like most of the time. I was so hopeful for this game.. Not what I was expecting when I read the description of the game. I lost interest after only a few minutes due being comepletely at a lost at what to do and just - being bored.. This game is not finished and does not work properly. Boring and repetative.
